

Instruction for installation

1 Diagram 1 shows the light fixture and its internal components. A schematic diagram indicates the connection of the L (Line) and N (Neutral) wires to the DRIVER, which is connected to the LED.	2 Diagram 2 shows the preparation of the mounting surface. A template is used to mark the mounting holes. A switch is shown in the OFF/AUS position.	3 Diagram 3 shows the junction box being mounted to the wall. The label "Junction box" points to the component.
4 Diagram 4 shows the power wires (L and N) being connected to the junction box.	5 Diagram 5 shows the drilling of holes and the insertion of the mounting screws into the wall.	
6 Diagram 6 shows the light fixture being mounted to the wall using the screws.	7 Diagram 7 shows the final check of the mounting and the switch position. The switch is shown in the ON/EIN position.	8 Diagram 8 shows the final view of the installed light fixture.

 The product must be installed by professional electrician!
